NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS
April 30, 2013
(Stated in Canadian Dollars)
(Unaudited)

Note 1 **Corporate Information**

Monster Mining Corp. (the “Company”) was incorporated in the Province of British Columbia on May 3, 2007 under the Business Corporations Act (British Columbia) under the name “Northex Ventures Inc.” and changed its name to “Monster Mining Corp.” on August 20, 2008. The Company was registered as an extra-territorial corporation under the Business Corporations Act (Yukon) on July 10, 2009. The Company completed its IPO pursuant to its prospectus dated April 26, 2011 (the “Prospectus”) and commenced trading on the TSX Venture Exchange (the “Exchange”) on May 19, 2011 under the symbol MAN. The Company is in the exploration stage and has entered into option and purchase agreements to acquire mineral properties in the Yukon, Canada.

The address of the Company’s corporate office and principal place of business is 750 – 580 Hornby Street, Vancouver, British Columbia, Canada.

Note 2 **Basis of Preparation**

a) Statement of Compliance

These unaudited condensed interim financial statements for the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). These condensed interim financial statements, for the nine month period ended April 30, 2013, have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting, however, they do not include all of the information required for full annual financial statements.

These condensed interim financial statements should be read in conjunction with the Company’s 2012 annual financial statements.

The condensed interim financial statements were authorized for issue by the Board of Directors on June 21, 2013.

b) Basis of Measurement

The condensed interim financial statements have been prepared on a historical cost basis, as modified by the revaluation of held-for-trading and available for sale financial assets.

The condensed interim financial statements are presented in Canadian dollars, which is also the Company’s functional currency, and all values are rounded to the nearest dollar, unless otherwise indicated.

Note 2 Basis of Preparation – (cont'd)

b) Basis of Measurement – (cont'd)

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The Company's accounting policies and areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Notes 3 and 4 of the Company's 2012 annual financial statements.

c) Going Concern of Operations

The Company has not generated revenue from operations. The Company generated gains on settlement and forgiveness of debt of \$222,319 and revenue from option payments of \$125,000, resulting in a net income of \$132,380 during the period ended April 30, 2013, and, as of that date, the Company's accumulated deficit was \$2,417,594. As the Company is in the exploration stage, the recoverability of the costs incurred to date on exploration properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. As at April 30, 2013, the Company had \$622 in cash, working capital deficiency of \$294,285 and no long-term debt. The Company does not have sufficient cash resources to meet its obligations for at least twelve months from the end of the reporting period. While the Company has been successful in obtaining the necessary financing through the issuance of common shares and loans from related parties in the past, there is no assurance it will be able to raise funds in this manner in the future and there remains significant doubt as to the Company's ability to continue as a going concern.

These financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of operations, and at amounts different from those in the accompanying consolidated financial statements.

Note 3 Available for sale investments

Available for sale investments consists of investments in common shares of Dawson Gold Corp ("Dawson") and shares of O'Conner Lake Mines Ltd. ("O'Connor").

On February 28, 2013, Dawson consolidated its shares, 10 pre-consolidated shares for 1 post-consolidated share.

At April 30, 2013 and July 31, 2012 the Company held the following shares:

Note 10 Financial Instruments

a) Interest Rate Risk

The Company's cash earns interest at a variable interest rate. Due of the nature of this financial instrument, fluctuations in market rates do not have a significant impact on estimated fair values as of April 30, 2013. Future cash flows from interest income on cash will be affected by interest rate fluctuations. Interest rate risk consists of two components:

- (i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (ii) To the extent that changes in prevailing market interest rates differ from the interest rates in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

The Company's exposure to interest rate fluctuations is minimal.

b) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company is exposed to credit risk with respect to its cash balance, the balance of which at April 30, 2013 is \$622. Cash is held at a chartered Canadian financial institution. The Company is also exposed to credit risk with regard to the drilling advance.

c) Liquidity Risk

Liquidity risk arises from the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements. The Company achieves this by maintaining sufficient cash reserves and highly liquid short-term investments. As at April 30, 2013, the Company had \$622 in cash, working capital deficiency of \$294,285 and no long-term debt and the Company does not have sufficient cash resources to meet its obligations for at least twelve months from the end of the reporting period. While the Company has been successful in obtaining the necessary financing through the issuance of common shares and loans from related parties in the past, there is no assurance it will be able to raise funds in this manner in the future and there remains significant doubt as to the Company's ability to continue as a going concern. The Company's trade and other payables are due in the short term.

d) Currency Risk

Currency risk is the risk that funds held in currencies other than the operating currency will fluctuate negatively, resulting in a foreign exchange loss. At April 30, 2013, the Company held no funds in foreign denominations.
